

# Six trends to watch

From monochrome to clashing colours, night skies to the animal kingdom, bridal parties to mosh pits, here's what's inspiring us for spring/summer 2019

## **Colour pops**

Discover a vibrant mix of hues that can be coordinated or clashed to express a unique personal style. Stacks of irregularly shaped crystals, unusual rose-cut gemstones and layered precious metals can be curated for a pop of spring/summer colour.

## Androgyny rocks

Minimalist coin pendants lead the gender-flexible jewellery charge, which leans towards a rock 'n' roll aesthetic with lots of black, chrome, silver and chunky metal. Think layers of silver paired with leather, chunky signet-style rings and mosh-pit-worthy collars.
